Théo Duez

theo.duez [at] enpc [dot] fr · theozeud.github.io

Born on 11 September 2000 – Based in Paris, France

Education

Oct 2024–Sep 2027
PhD in Applied Mathematics for Quantum Chemistry
CNRS – CERMICS, École Nationale des Ponts et Chaussées, Champs-sur-Marne, France
Thesis: New formulations, approximations and numerical methods for Time-Dependent Density Functional Theory (TDDFT)
Supervisors: Éric Cancès and Mathieu Lewin

Sep 2020 – Sep 2024
Master of Science (Diplôme d'Ingénieur), Mathematics specialization
CentraleSupélec - Gif-sur-Yvette
Includes a gap year (Sep 2022 – Sep 2023) for research internships at CEA Paris-Saclay and the Max Planck Institute – see Research Experience

Sep 2023 – Sep 2024
Master 2 (M2), Analysis, Modelling and Simulation (AMS)
Université Paris-Saclay
Completed concurrently with the final year at CentraleSupélec

Sep 2021 – Jul 2022
Master 1 (M1), Fundamental Mathematics track
Université Paris-Saclay
Completed concurrently with CentraleSupélec; two courses taken at Saclay, remaining credits validated from CentraleSupélec coursework

Sep 2020 – Jul 2021
Bachelor's Degree, Mathematics
Université Paris-Saclay
Completed concurrently with the first year at CentraleSupélec

Sep 2018 – Aug 2020
Classes Préparatoires (CPGE), MP – option Informatique
Collège Stanislas, Paris

Research Experience

Apr 2024 – Aug 2024
Research Intern
Inria Paris & CERMICS, Champs-sur-Marne, France
Supervisor: Éric Cancès

Apr 2023 – Aug 2023
Research Intern
Max Planck Institute, Numerical Methods for Plasma Physics department, Munich, Germany
Supervisor: Michael Kraus

Nov 2022 – Mar 2023

Research Intern

CEA Paris-Saclay, Thermohydraulics and Fluid Mechanics team (STMF/LMSF), Saclay, France

Supervisor: Alain Cartalade

Nov 2020 – May 2022

Research Training

CentraleSupélec, Gif-sur-Yvette, France

Supervisor: Ludovic Goudenège

Publications

2026

V-Representability Beyond Singular Times in Time-Dependent Density Functional Theory: The Hubbard Dimer Case

É. Cancès, T. Duez

Preprint — arXiv:2610.33837

2026

Geometric Time-Dependent Density Functional Theory

É. Cancès, T. Duez, J. van Gog, A. B. Lauritsen, M. Lewin, J. Toulouse

Physical Review Letters 136, 256401 — arXiv:2601.07724

2026

Geometric Theory of Constrained Schrödinger Dynamics with Application to Time-Dependent Density-Functional Theory on a Finite Lattice

É. Cancès, T. Duez, J. van Gog, A. B. Lauritsen, M. Lewin, J. Toulouse

Physical Review A 113, 062222 — arXiv:2601.07719

Talks

Nov 2026 (upcoming)

V-Representability Beyond Singular Times in Time-Dependent Density Functional Theory: The Hubbard Dimer Case

MOANSI International Workshop 2026 - Laboratoire Jacques-Louis Lions, Sorbonne Université, Paris, France

Apr 2026

Illustration of the Geometric Principle in TDDFT with a 1D Soft-Coulomb Model

REGAL Workshop on the Foundations and Extensions of Density-Functional Theory - OsloMet, Oslo, Norway

Mar 2026

Constrained Schrödinger Dynamics and the Foundations of TDDFT

96th GAMM Annual Meeting - Stuttgart, Germany

Posters

Oct 2025

Accurate Ground State Computations of Atoms and Ions in Extended Kohn-Sham Theory

JuliaCon Local - CNAM, Paris

Sep 2025

Negative Atomic Ions In Extended Kohn-Sham Theory

Modern Wavefunction Based Methods in Electronic Structure Theory - University of Pisa, Italy

Teaching Experience

Apr 2026 – May 2026

Partial Differential Equations: Variational Approaches

École Nationale des Ponts et Chaussées — Undergraduate Year 3 — Lecture + Tutorials 12h

Reference professor: Frédéric Legoll

Jan 2026 – Apr 2026

Analyse des EDPs (Distributions, Fourier Analysis, L^p Spaces)

École Nationale des Ponts et Chaussées — Undergraduate Year 3 — Lecture + Tutorials 21h

Reference professor: Virginie Ehrlacher

Sep 2025 – Oct 2025

Modeling with partial differential equations

École Nationale des Ponts et Chaussées — Undergraduate Year 3 — Tutorials 7.5h

Reference professor: Tony Lelièvre

Apr 2025 – May 2025

Partial Differential Equations: Variational Approaches

École Nationale des Ponts et Chaussées — Undergraduate Year 3 — Lecture + Tutorials 18h

Reference professor: Frédéric Legoll

Jan 2025 – May 2025

Supervision of a project of students

École Nationale des Ponts et Chaussées — Undergraduate Year 3 — Supervision 12h

Sep 2024 – Nov 2024

Analyse des EDPs

École Nationale des Ponts et Chaussées — Undergraduate Year 3 — Lecture + Tutorials 20h

Reference professor: Virginie Ehrlacher — Substitute teacher

Sep 2021 – Apr 2022

Convergence, Integration, Probability and PDEs

CentraleSupélec — Undergraduate Year 3 — Tutorials 20h

Jul 2021

Teacher for the Summer School in Mathematics

CentraleSupélec — Undergraduate Year 2 — Tutorials 18h

Awards

2023

Sophie Germain Excellence Scholarship

Fondation Mathématique Jacques Hadamard (FMJH)

Awarded for the Master's program in Mathematics and Applications, Université Paris-Saclay / Institut Polytechnique de Paris

Schools

Nov 2026 (upcoming)
Oberwolfach Seminar: Numerics for Evolutionary PDEs – From Nonlinear Parametrizations to Time Integration
Mathematisches Forschungsinstitut Oberwolfach, Germany

Sep 2025
Modern Wavefunction Based Methods in Electronic Structure Theory
University of Pisa - Pisa, Italy

May 2025
7th Mini-School on Mathematics for Theoretical Chemistry and Physics
Laboratoire Jacques-Louis Lions - Paris, France

May 2024
6th Mini-School on Mathematics for Theoretical Chemistry and Physics
Laboratoire Jacques-Louis Lions - Paris, France

Conferences Attended

Sep 2024
Manuel Conference - Mathematical and Numerical Analysis of Electronic Structure Models
Stuttgart, Germany

Skills

Software: Julia, Git, C++, Python, MATLAB, LaTeX, Linux

Languages: French (native), English (C1), German (B1)

Interests

Sports: Running, Trail Running, Mountain Sports
